

Meter / Mix / Dispense

Until recently mixing liquid and powder on demand has almost been impossible. Mahr Metering Systems has created a liquid metering system which is in-line with dry feeding. The new mixing methods of Mahr's equipment now has dynamic mixing abilities with very low shear.

- Fully Automated Delivery
- On-line Data Logging
- Reduced Waste

- Liquid & Liquid Powder Dispensing
- Single Component Metering
- Plural Meter, Mix, Dispense
- On-demand Dispensing

Liquid / Powder Meter Mix

When blending liquids and powders, creating a homogeneous mixture can be a bit of a challenge. Mahr has introduced its new low shear, static / dynamic mixing system. While it is Mahr's continuous effort to incorporate disposable static mixing, some powders such as colors require a more aggressive mixing method. Mahr utilizes the most up to date electrical components with custom programming to fit the exact application needs of each individual process.
